PROFESSIONAL EXPERIENCE

Full Stack Developer Jiasaz, Erbil, Iraq **January 2022 – Present**

- I've joined Jiasaz as a full-stack developer to **develop, maintain and optimize** different parts of Jiasaz's systems like: medical management system, school system and Global Cargo Systems

- during the period of my employment, I was not focused on a single component but rather on doing tasks from both ends (front end, back end) from multiple parts of Jiasaz.

- At first, I was mainly Back-end Focused that I **designed database ERDs** for new features, and **query optimization** for some queries and I was **improving** their customer service system UI.

- then, I started to work on the jiasaz Pay project from both ends. I **built the Admin dashboard from scratch** and I was **reviewing and testing the back-end**.

- **Managing** a passionate team to deliver & building clients' projects and requests in the most efficient way.

- Code review and Task distribution also making ensuring that tasks have been handled correctly.

- Finally, I started to work on Jiasaz's Dispatching system. I was **maintaining, Optimizing, Revamping, and adding** features to a **Microservice architecture-oriented Application** from both ends.

- **Skills:** PHP · Laravel · Testing · Slim · MySQL · jQuery · AJAX · Amazon SQS

Backend developer Homele, Erbil, Iraq February 2021 – June 2022

- I was a **Core Developer of building APIs** of a Real-estate Management system and Part of multiple management systems in Accounting, Property, and inventory domains.

- One of my new responsibilities was **Requirement Engineering** to be a bridge between development and the business.

- As working on the management systems as a back-end developer, I was also the **main front-end developer to build** the dashboards and integration with the backend.

- After a while, I was taking more responsibility to fill our company's needs and I was stepping up into another position of full stack developer.

- **Skills:** DevOps · Laravel · jQuery ·AJAX · MySQL.

Backend developer Artvit Company, Erbil, Iraq September 2020 – February 2021

- Started my career life with a Artvit company, I started as a back-end developer to develop, maintain and optimize Artvit's systems.
- I was mainly focused on building APIs to develop highly dynamic systems.
- Collaborating with the front-end team to ensure integration between both ends.
- At the same time, I was maintaining some previous made APIs for any new feature or bug fixes.
- After a while, I was taking more responsibility to fill our company's needs and I was stepping up into another position of full stack developer.
- **Skills:** Laravel · MySQL · JavaScript · jQuery.

Back-end Developer & DevOps Freelancer Work 2019 – Present

- Worked as a Team or individually to develop Rest API for multiple Projects.
- I did Requirement gathering and Project Overview during this period.
- **Skills:** Git · DevOps · Laravel · PHP · Express.js · jQuery ·AJAX · MySQL · MongoDB · PostgreSQL.
